WORLD MENTAL HEALTH DAY

World Mental Health Day is observed on **10 October** every year, with the overall objective of raising awareness of mental health issues around the world and mobilizing efforts in support of mental health.

The Day provides an opportunity for all stakeholders working on mental health issues to talk about their work, and what more needs to be done to make mental health care a reality for people worldwide.

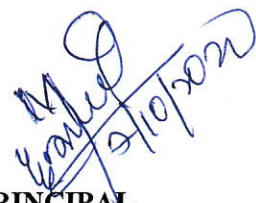

This statement necessitates that under the current global health emergency no-one should be denied mental health care. **Psychosocial support and mental health national plans** need to address the mental health consequences of the COVID-19 pandemic and its impact on citizens. It is therefore of great significance and importance that the theme for World Mental Health Day 2020 will be:

MENTAL HEALTH FOR ALL

GREATER INVESTMENT – GREATER ACCESS
